

21st Century Technology: Being connected for learning!

Workshop:

1 Hour:

Equipment: Ipad, Laptop, Camera, Video Camera, Phone.

Differentiated learning, personalised learning, 1:1, connected, engaged, networked, web 2.0. I am sure you have heard the following to describe how technology is changing learning in our schools! This workshop will focus on giving the audience authentic hands on experiences on how technology can enhance student learning outcomes. At the same time the group will discuss and engage with the many issues around technology in our schools.

Participants will engage in a networked environment to complete learning tasks that use a range of technologies. They will then be able to use and adapt these skills and tasks to their classroom!

Participants will engage with some of the following technology and create examples of how it can be used in the classroom to engage students and improve their learning outcomes.

- Blogs
- Networked class environment
- Discussion Boards
- iPad's
- Camera's
- Video

About the presenter:

Steve Kavanagh is the learning leader for technology at Unity College, Murray Bridge, SA. He has been in the role for over 5 years implementing a 1:1 device platform across 6 – 12. He supports teachers to use technology to improve student outcomes and has ran many school based Professional Development sessions to help staff increase their understanding on how technology can transform and not just replace classroom practice and learning.
